

 Summary

Highly motivated and detail-oriented Backend Developer Intern with experience in designing, developing, and maintaining RESTful APIs using ASP.NET Core and PostgreSQL. Eager to apply skills in performance optimization, database management, and collaborative problem-solving to contribute to a dynamic team. Proven ability to learn quickly and adapt to new technologies.

 Skills

- Languages:** Java, Kotlin, C++, Python, Dart
- Frameworks:** ASP.NET Core, MERN Stack, Laravel, Android Studio
- Databases:** PostgreSQL, MySQL, MongoDB
- Version Control:** Git, GitHub
- Core:** REST API Development, API Integration, Natural Language Processing, Authentication & Authorization, Debugging

 Education

- Shrimad Rajchandra Institute Of Management And Computer Application , Uka Tarsadia University**
Master Of Computer Applications *Bardoli, Gujarat*
2025-2027
SGPA: 9.45
- V.S. Patel College Of Arts & Science, Veer Narmad South Gujarat University**
Bachelor Of Computer Applications, CGPA: 8.76 *Bilimora, Gujarat*
Apr 2025
- Higher Secondary (12th, GSEB) , 35%**
Aug 2022
- Secondary (10th, GSEB), 70%**
Mar 2018

 Experience

- Kriptone**
Backend Developer Intern *Bilimora, Gujarat*
Oct 2024 - Jun 2025
- Optimized image processing algorithms, reducing server load by 20% and improving application performance.
 - Managed PostgreSQL database operations to ensure data integrity and efficient data retrieval.
 - Implemented file explorer tracking to monitor file exchanges and ensure the safety of confidential data.

 Projects

- E-commerce Jewelry Application (Android, ASP.NET Core, PostgreSQL)**
Developed a mobile application with backend API for selling jewelry products.
Implemented product listing, wishlist, cart and order management features
Built REST API using ASP.NET Core with PostgreSQL for data handling
- Clinic Management System (ASP.NET, PostgreSQL)**
Developed a desktop-based application using client-server architecture over a local network.
Managed patient records, prescriptions, and certificate data
Implemented medicine stock tracking and efficient data storage

Interactive Learning & Performance System (ILPS) (Flutter, React, Flask, NLP)

Developed a web and mobile-based system with NLP-powered features for question management.

Implemented grammar checking and duplicate question detection using NLP

Built features for user contributions and question suggestions

Image Optimization System(ASP.NET Core)

Developed a system to optimize image processing and storage efficiency.

Maintained image quality while optimizing file size

Job Recommendation System (Python, NLP)

Developed an NLP-based system to recommend jobs based on user input.

Applied text processing techniques for better matching

Improved relevance and accuracy of recommendations
